## Dear Customer

Tschudi Ship Management carries out crewing and technical management for a variety of vessels. This includes offshore support vessels, specially developed for the oil, gas and wind farm industry.

The recent addition of multi-purpose/standby vessel Viking Pioneer (TBR) further confirms our standing as reliable ship managers. This vessel will be based in West Africa where we already have many years' experience from operating and manning vessels coastwise and offshore Angola. Further being locally represented in Luanda with Tschudi Angola-Navegação LDA we are ideally situated for West African projects and local recruitment. Similar services can also be offered from Mozambique.

Our team provides high quality and cost efficient services, along with the specific skills required for each vessel type in a diversified fleet. Additional commercial and operational services can be supplemented by other Tschudi Group companies.
